Art Unit: 3654

The following is an examiner's statement of reasons for allowance:

Claims 1-10 are allowable over the prior art of record because the prior art of record does not teach or suggest the entire combination of elements of the roll paper feed device set forth including a cradle provided with side cheeks (walls); supporting means in the form of two parallel and mutually spaced rollers; braking means for said rotating roll, which are joined to said cradle and have at least one elastic bearing member against at least one side of the paper roll, wherein said elastic bearing member comprises at least one elastically deformable arm joined to the cradle and at least one protruding zone which is situated at the free end of said arm and which is engaged through an opening made in a side cheek of the cradle and protrudes relative to the inner face of said cheek, and wherein said protruding zone is in the form of a protruding stub, which comprises a substantially flat bearing surface suitable for bearing against a side of the roll and peripherally surrounded by an inclined surface. None of the references of the prior art teach or suggest the paper roll feed device as advanced above and such does not provide the necessary motivation, absent applicant's specification, for modifying the feed device in the manner required by the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
